

# MITSUBISHI 380 BODY REPAIR MANUAL

**MITSUBISHI  
MOTORS**

## FOREWORD

This service manual has been prepared for the use of all service mechanics engaged in the body repair service of the Mitsubishi 380. Body dimensions, welded panel replacement procedures, body sealing and application instructions, and all the other information required to provide quick and accurate body repair service are contained herein.

One especially important point is the welding method. All of the vehicles original strength and durability can be maintained by following the welding procedures contained in this manual.

In order to maximise the efficiency of the repair work, first, both the extent of the damage and the replacement parts that are needed must be calculated accurately. Then the actual work must be performed accurately and efficiently.
