TRANSMITTER 2

KEYLESS ENTRY SYSTEM

[Main Index](#)[Group TOC](#)

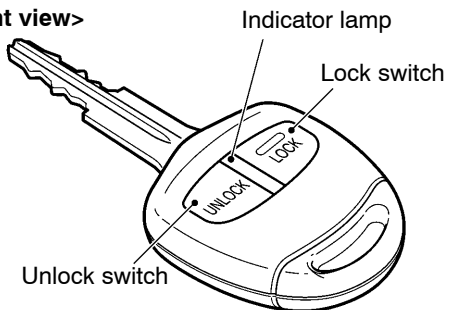

The shape of transmitter has been changed from the key ring type to the all-in-one type. Items other than below are the same as before.

TRANSMITTER

- The shining silver Three-diamond mark is featured on the rear surface of key grip in order to enhance the texture of the key.
- The indicator lamp that illuminates at the time of signal transmission is added to the key grip so that signal transmission status and low battery can be checked visually.
- Since the transmission circuit (board) and the battery are contained in a case that is fit into the key grip, waterproofing capability can be improved.
