REAR AXLE

CONTENTS

GENERAL INFORMATION	27-2
---------------------------	----------------------

GENERAL INFORMATION

M2270000100230

The rear axle has the following features:

- The wheel bearing is a unit ball bearing (double-row angular contact ball bearing) which incorporates the oil seals and is highly resistant to thrust loads.

- ABS rotor for detecting the wheel speeds is press-fitted to the rear hub.

SPECIFICATIONS

Item		Specification
Wheel bearing	Type	Unit ball bearing (double-row angular contact ball bearing)

NOTE: The wheel bearing is part of the hub, therefore its size is not listed here.
